

## Gimmel GIS Integration Demonstrations

### Can you search across ALL your content?

View the latest in Gimmel GIS integration demonstrations powered by ESRI, Mark Logic, SharePoint, and Open Spirit and learn how to address:

- **Search** – across all content, unstructured and structured
- **Spatial Search** - enhance other tools such as SharePoint, Documentum, Open Text
- **Metadata management** – GIS, unstructured, and industry-specific
- **XML Content Management** – leverage high-performance tools for content

#### Why Gimmel

Business today is about bringing information together in a cost-efficient and legally compliant manner. Gimmel provides information management services across planning, strategy, technical implementation and integration of enterprise content and records management, geographic information systems and interactive media. We produce solutions that enable organizations to quickly access, view and analyze integrated data.

#### Why Mark Logic

Mark Logic provides information access and delivery solutions that accelerate the creation of content applications. Customers across a range of industries rely on Mark Logic to make them more agile — repurposing content, creating new products faster and delivering content through multiple channels.

#### Why Open Spirit

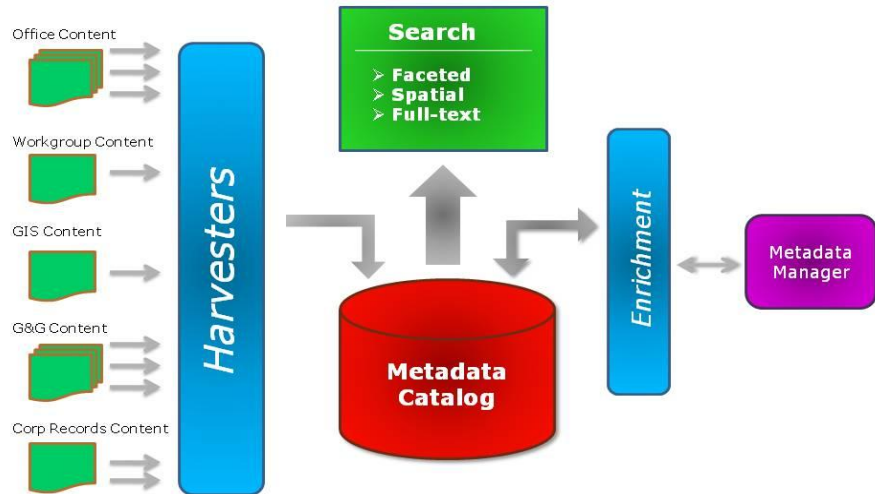

Open Spirit is a leading provider of application integration middleware for upstream oil and gas software applications. By understanding multi-vendor environments, Open Spirit solutions bring together the best tools to view the subsurface, making collaborative workflows and cross-discipline decisions a business imperative.
